

PRESS RELEASE

Not to be disclosed before 16.th of May in celebration of Unesco International Day of Light

UNESCO International Day of Light 2020

Nominees of the Nordic Lighting Design Award 2020

To celebrate this year's International Day of Light on May 16th, the Nordic Lighting Organizations are proud to announce the nominees to Nordic Lighting Design Award 2020.

Projects eligible for the Nordic Lighting Design Award are the national winners from Denmark, Finland, Iceland, Norway and Sweden from the past two years. These projects represent the best of Nordic Lighting Design to the Nordic lighting organisations. The purpose of The Nordic Lighting Award is to highlight the particular qualities inherent in the Nordic lighting culture.

About the award:

Nordisk Lyspris or The Nordic Lighting Design Award was created by the Nordic Light Committee in the year 2000. The Nordic Lighting Award is primarily awarded to especially remarkable lighting installations, daylight and artificial light that in an exemplary way combines aesthetics, architecture, technology, quality and energy. Originality and creativity are given large weight when evaluating.

The Nordic Light Committee consists of the lighting organisations Dansk Center for lys in Denmark, Suomen Valoteknillinen Seura in Finland, Ljóstæknifélag Ísland in Iceland, Lyskultur in Norway and Belysningsbranschen in Sweden. The award is handed out biannually and the purpose is to highlight and celebrate the special characteristics of Nordic lighting design.

Chair of jury.

Ourania Georgoutsakou, General Secretary of Lighting Europe
